

# hinge adjustment

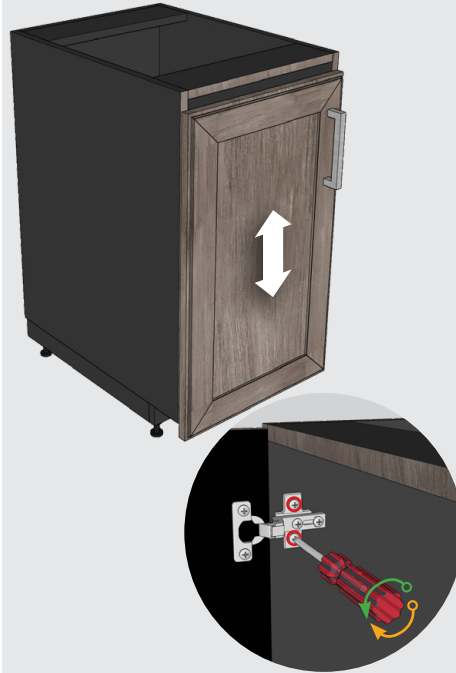

Our hinges offer 6-way adjustment:

**Side adjustment (Left - Right)**

Rotate the front screw to **increase** or **decrease** door overlay (-0.0591", +0.1378").

**Height adjustment (Up - Down)**

**Loosen non-cam screws** to adjust door position (+-0.0787") and **re-tighten** screws.

**Depth adjustment (In - Out)**

**Loosen non-cam screw** to adjust door gap (-0.1378", +0.0787") and **re-tighten** screw.

Applications:

- To reduce gaps between two butt doors
- Prevent doors from binding at the sides
- Align door with side of drawer/grill front
- Straighten a slightly rotated door

Applications:

- To reduce gap to countertop
- Help reduce water intrusion
- Prevent doors binding on the countertop
- Correct alignment of doors and drawers

Applications:

- To ensure front face alignment
- Help reduce water intrusion
- Correct doors that have slight curvature due to incorrect hinge adjustment
